

ECHLIN

CAMSHAFT & CRANKSHAFT SENSORS

WHAT'S IN YOUR BOX?

The Most Consistent and Durable Camshaft and Crankshaft Sensors in the Industry

Today's advanced engines depend on accurate and consistent information from cam and crank Sensors for performance, fuel economy and emissions, and not all cam and crank sensors are created equal. NAPA® Echlin® Cam and Crank Sensors feature an integrated A/D convertor and digital signal processing for reliable and consistent performance in all situations.

**What's inside the NAPA® Echlin® box...
Advanced engineering, precision
manufacturing and comprehensive
testing. What's in Your Box?**

NAPA® Echlin® Cam and Crank Sensors also feature advanced circuitry to protect against stray magnetic fields and power spikes. Best of all, you can recommend NAPA® Echlin® Cam and Crank Sensors with confidence knowing that each component has been end-of-line tested for timing, pulse width and signal amplitude.

**1,000+
SKUs**

More than 1,000 SKUs and 95% coverage for domestic and import applications

**KITS FOR A
COMPLETE JOB**

NAPA® Echlin® Camshaft Sensor Kits contain camshaft sensors along with high-temperature connectors to replace the damaged originals

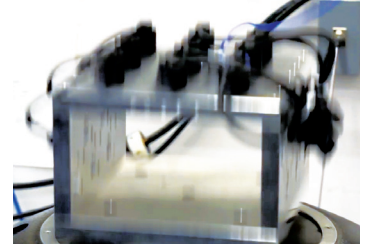

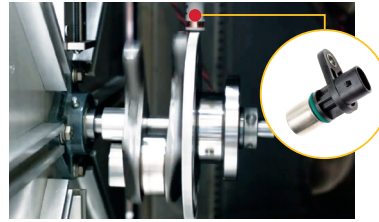

As an expert manufacturer, you know what to expect every time you open our box. Can your supplier say the same?

Our standards are so high, we know they'll meet yours.

OUR EXTENSIVE TESTING ENSURES DURABILITY AND PERFORMANCE

Sensors undergo 48-64-hour vibration tests and chamber testing cycles from -40°F to 257°F to ensure a long service life in extreme conditions.

NAPA® Echlin® Camshaft Sensor Kits

OE PROBLEM:

Camshaft sensors on Nissan / Infiniti applications are known for their high failure rates

NAPA® ECHLIN® SOLUTION:

A new, advanced-engineered Camshaft Sensor with an integrated A/D converter and new high-temp connector for a complete service

Advanced circuitry provides immunity from EMI that meets ISO standards

Fluorocarbon rubber oil seal ensures secure fit

Sealed construction withstands extreme under-hood conditions

Integrated A/D converter sends a digital signal for precise ignition timing, optimizing fuel economy and performance

High-temp connector to replace the melted/damaged originals

CSS1092K
Infiniti / Nissan Cars & SUVs
(2007-01)
VIO: 170K

We offer 25 NAPA® Echlin® Camshaft Sensor Kits for popular applications. For our complete offering, visit NAPAEchlin.com.
